

Your Partner's Body

Understanding the female reproductive system can only improve your ability to understand the language of birth and pregnancy. You really don't have to be a genius to take this all in, but without knowing any of this, you may lose the power to be able to protect your child and partner. Believe me you really don't need to have a medical background. We don't, but we do understand enough to know that when an intervention is introduced, we'd better know enough to help make good decisions.
